

TARUNYA KESHARWANI

SOFTWARE DEVELOPER | FULL-STACK (MERN+) | OPEN SOURCE CONTRIBUTOR

PROFILE

First-year CSE (AI) undergraduate with hands-on experience building production-grade web applications and contributing to open-source projects. Strong foundation in the MERN stack, REST APIs, and offline-first architectures, with experience using JavaScript, React, Node.js, MongoDB, and Git/GitHub to build scalable backend systems.

WORK EXPERIENCE

Open Source Contributor | Multiple Organizations

Contributor (Selected Contributor — SWoC) SEP'25 - PRESENT

- Contributed to open-source projects across Meshery, JSON Schema (json-schema-org), Sugar Labs, and OpenSource-Compass by submitting pull requests and reporting frontend and documentation issues
- Collaborated with maintainers through pull request reviews and issue discussions, contributing UI enhancements using JavaScript, HTML, and CSS.
- Selected Contributor for Social Winter of Code (SWoC); actively preparing for Google Summer of Code (GSoC) and Linux Foundation Mentorship (LFX) through sustained open-source contributions

Damru Fest 2025 | Rishihood University

Competition Crew Member SEP'25 - DEC'25

- Assisted in planning and execution of inter-college competitions during a large-scale university fest
- Coordinated with team members, participants, and faculty to ensure smooth event operations
- Developed communication, teamwork, and on-ground problem-solving skills in a fast-paced environment

PROJECTS

Budgett — Offline Expense Tracker (PWA + Chrome Extension)

Self Project - for real world problems NOV'25 - DEC'25

- Built a privacy-first, offline-ready expense tracker for students as a PWA, responsive web app, and Chrome extension
- Implemented offline-first architecture using IndexedDB with optional Firebase cloud sync
- Developed a Chrome Extension for one-click expense logging directly from the browser
- Ensured financial accuracy using integer-based paise calculations instead of floating-point math

Tech: JavaScript, HTML, CSS, IndexedDB, Firebase, PWA APIs, Chrome Extensions

Mindbridge — Mental Wellness Platform

Web Maven AUG'25 - SEP'25

Smart India Hackathon 2025

- Co-developed a web-based mental health platform focused on accessibility and early support
- Integrated an AI-powered RAG chatbot for contextual conversations and resource discovery
- Applied human-centered and ethical AI design principles for sensitive use-cases

Tech: HTML, CSS, JavaScript | RAG, Prompt Engineering, Vector DBs

EDUCATION

2025 - 2029

NEWTON SCHOOL OF TECHNOLOGY

Bachelor of Technology (B.Tech) — Computer Science (Artificial Intelligence) 2025

ADDITIONAL COURSEWORK

- Entrepreneurship for Social Good — MIT Sloan School of Management (1-credit course, 2025)
- GRADE: A+

SENIOR SECONDARY (CBSE)

- Royal Senior Secondary School - Class XII (2025) - CS 85% | Maths 80%
- Kendriya Vidyalaya - Class X (2023) - 94.6%

SKILLS

- Languages:
 - JavaScript, Python, HTML, CSS
- Frontend:
 - React, Vite, PWAs, Chrome Extensions
- Backend:
 - Node.js, Express.js, MongoDB, Mongoose, REST APIs
- Databases & Storage:
 - MongoDB, IndexedDB, Firebase, Vector Databases (basic)
- Tools & Platforms:
 - Git, GitHub, Postman, Figma, Canva
- Core Strengths:
 - Problem Solving
 - Offline-first & Scalable System Design
 - Open-source Collaboration
