

TARUNYA KESHARWANI

SOFTWARE DEVELOPER | FULL-STACK (MERN+) | OPEN SOURCE CONTRIBUTOR

+91 8770496596 tarunyak.10@gmail.com Delhi NCR, India linkedin.com/ github.com/ portfolio/

PROFESSIONAL SUMMARY

First-year CSE (AI) undergraduate focused on backend and systems-oriented web development, building real-time and offline-first applications using MERN and WebSockets. Contributed 15+ merged PRs to active open-source projects, working on modular architecture, API design, and performance improvements. Interested in scalable system design, efficient data handling, and production-grade engineering practices.

EDUCATION

Newton School Of Technology 2025-2029	Focused on full-stack development, real-time systems, and backend architecture.
B. Tech - Computer Science & Artificial Intelligence (CS/AI)	
MIT Sloan School of Management 2025	Studied product validation and user-centric design for scalable solutions.
Additional Coursework - Entrepreneurship for Social Good	

WORK EXPERIENCE

GSOC, LFX, ECWoC, SWoC | Sep 2025 - Present

Open Source Contributor – C2SI, Meshery, OpenSource-Compass

- Contributed to production-grade open-source projects with evolving architectures and active maintainers.
- Submitted 25+ pull requests (18+ merged) across C2SI, Meshery, and OpenSource-Compass, covering feature development, backend improvements, and developer experience enhancements.
- Delivered ~2.3k+ lines of production code while removing ~3.2k lines, improving code quality, maintainability, and system clarity.

Building apps w/ Product thinking | Nov 2025 - Present

Product Engineering Experience

- Needed to design features aligned with real user workflows (chat, expense tracking)
- Iterated on UX flows, reduced friction (e.g., Chrome extension quick-add, real-time updates), and validated usability through testing.
- Improved user interaction efficiency and reduced steps required for key actions.

Damru Fest 2025 | Rishihood University | Nov 2025

Event Management - University Fest

- Assigned responsibility for managing 3 parallel events within a large-scale university fest.
- Planned schedules, coordinated with organizers and participants, and ensured resource allocation across events without conflicts.
- Successfully executed all 3 events on time with minimal disruptions.

PROJECTS

Personal Project | Jan 2026

Echo – Real-Time Chat Platform (MERN + WebSockets) Full-Stack Application

- Needed low-latency, scalable real-time communication for a multi-user chat platform.
- Designed and implemented a WebSocket-based messaging layer using Socket.io, with room-based event routing and message queuing to handle concurrent users.
- Achieved sub-200ms message delivery latency and supported 100+ concurrent connections without message loss.

Project Impact | Nov 2025

Budgettt – Offline Expense Tracker (PWA + Chrome Extension)

- Needed a reliable expense tracker that works without internet access and syncs seamlessly when online.
- Implemented a PWA using Service Workers with IndexedDB for local-first data storage, along with background sync to reconcile offline transactions with the server.
- Enabled 100% offline functionality with zero data loss and automatic state reconciliation upon reconnection.

SKILLS

- Frontend:** TypeScript, React, React Router, Zustand/Redux, TanStack Query, Tailwind CSS, Framer Motion
- Cloud & Deployment:** Vercel, Render, Firebase, MongoDB Atlas
- Soft Skills:** Problem Solving, System Design Thinking, Ownership, Collaboration, Adaptability, Attention to Detail, Time Management, Product Thinking
- Real-time & PWA:** IndexedDB, Service Workers, Web App Manifest, Offline caching
- AI:** OpenAI, Gemini, Groq APIs
- Open-Source:** C2SI & Mesher contributor
- Backend:** Node.js, Express, REST, WebSockets (Socket.IO), JWT/Auth (cookies, sessions, bcrypt), MongoDB/Mongoose
- Tooling:** Git/GitHub, npm, Vite, Nodemon, Env configs

EXTRACURRICULAR ACTIVITIES

DamRu - University Cultural Fest - Managed and planned 3 events in the fest, learning people and team management.
Smart India Hackathon (2025) - Built a system to cater and help aspirants and students dealing from mental stress.
